

**WELCOME TO CANNA**

# GRAB YOUR EXPLORER BACKPACK

From the Atlantic puffin to the elusive Manx shearwater, many seabirds across the UK are under threat from invasive species.

Protected areas like Canna are very important to help keep these amazing birds safe.

Have fun exploring and finding all the amazing wildlife on Canna and don't forget to share your photos with us on Twitter @biosecurityLIFE and @CannaRangersNTS. We hope you enjoy your trip!

**PLEASE RETURN ALL ITEMS**

## You can help!

- ✓ Check your bags for rats before getting on the boat
- ✓ Don't disturb the wildlife
- ✓ If you see an animal that shouldn't live there, report it!
- ✓ Take your rubbish home with you

### 'Biosecurity'

Biosecurity is the actions we take to protect islands like Canna from invasive predators. You can help by packing your bag on the day you travel and checking for signs of stowaways before boarding a boat to an island.

### 'Invasive Predator'

An invasive predator is an animal that has been introduced to an island by humans, and threatens native species like ground-nesting birds by eating their eggs and chicks - seabirds can't defend themselves from these skilled hunters.
